ABOUT ME

Software Engineer focused on building reliable backend systems and practical software solutions. Experienced in developing application services, integrating systems, and solving real-world technical problems. Able to contribute to a team by building scalable solutions, improving workflows, and turning business requirements into working applications.

WORK EXPERIENCE

Grootan Technologies | Full Stack Development Intern **Feb 2026 - July 2026**

- Developed applications using Java, Spring Boot, Spring Data JPA/Hibernate, and PostgreSQL.
- Built event-driven communication using Apache Kafka.
- Implemented IAM, authentication and authorization using Keycloak.
- Managed database schema migrations using Liquibase.
- Containerized backend services using Docker, built using Maven, and collaborated using Git.
- Worked on exception handling, debugging, logging, code reviews, and feature development.
- Collaborated with cross-functional teams to deliver scalable backend solutions.

EDUCATION

Bachelor of Engineering | Bannari Amman Institute of Technology **2022 - 2026**

Computer Science and Engineering - CGPA (8.00)

SSLC & HSC | Saratha Matric Higher Secondary School

SSLC - 97.60% & HSC - 90.33%

PROJECTS

Secure AI Chat with PII Redaction

Developed a privacy-focused AI chat application that extracts text from images using OCR, automatically redacts sensitive information (PII), and securely interacts with a local LLM. Implemented chat session management, image processing, and secure backend APIs.

AI-Powered Property Maintenance Management System

Built an AI-enabled property maintenance platform using ERPNext, ThingsBoard, Flowise, and OpenWebUI, integrating IoT monitoring, automated maintenance workflows, AI-powered issue analysis, vendor management, and RAG-based assistance to streamline property operations.

TrustLocal — Local Service Booking Platform

Developing TrustLocal, a location-based marketplace connecting customers with verified local service providers. Implementing service discovery, booking management, real-time chat. Building provider verification, flexible billing, and work-completion receipts, along with an admin dashboard for user management, provider approvals, bookings, reviews, and support tickets.

TECHNICAL SKILLS

Languages: Java, SQL
Databases: Postgresql, Mysql, MongoDB
Security: Keycloak, OAuth 2, JWT
Workflow Automation: n8n, Flowise
Fundamental Skills: Linux, Computer Networks

Backend: Spring Boot, Kafka, Liquibase, Node.js, Express.js
Devops: Docker, Git, Github Actions(CI/CD)
Observability: OpenTelemetry
Other tools: ERP Next, ThingsBoard, OpenWebUI

CERTIFICATIONS

- Spring Boot 4 & Spring Framework 7 **Udemy - 2026**
- Apache Kafka **Udemy - 2026**
- n8n **Udemy - 2026**
